Personal Projects

SarsHub Covid Tracker – Sep 2021

Sarshub is a website that provides real-time COVID-19 statistics and data visualization from around the world to keep individuals informed and help them make informed decisions.

Made with ♥ Using React NextJs, NodeJS , JavaScript

WorldCountriesApi – Mar 2022

Express API for easy access and display of global country information, including ISO codes, names, continents, and phone codes . Made with ♥ Using Express and TypeScript

Postlike – Jan 2023

I built a website like Postman that lets users test and debug APIs by sending HTTP requests and viewing responses, making API development more efficient and streamlined. Made with ♥ Using React Vite, Axios, Tailwind and TypeScript

FST Hackathon – Mar 2022

My platform simplifies building management by improving communication and organization among residents, owners, and managers. It streamlines tasks such as maintenance requests, rent payments, and announcements. Made with ♥ Using Express, PostgreSQL, React Vite, Axios, Tailwind and TypeScript ...

Esprit Hackathon SuSustainable – Mar 2023

My website tracks and predicts carbon footprints in universities, helping them take sustainable actions and stay within consumption thresholds. Made with ♥ Using Express, PostgreSQL, React Vite, Axios, Go, Flask, Docker Tailwind and TypeScript ...

Inboxify – Apr 2023

My platform simplifies visitor message collection for organizations, offering a seamless and customizable experience via API or directly on the platform. Made with ♥ Using Express, PostgreSQL, React Vite, Axios, Tailwind and TypeScript ...
